Subject RE: In-stream sediment removal area

Sam, I have to work from home today so let's use my call-in number at 10 am CDT. 866-606-4717, code 2383118#. Mark Brown will be joining us, but I think the four of us are enough to address this issue. Thanks.

Subject: In-stream sediment removal area

Sam

Attached is a map that depicts the area in question. I have placed a red box in the approximate area of the identified in-stream sediment (note it is not to scale but is approximately 40' x 350'). It generally occurs from the upstream edge of the TSCA polygon located in Area 1, downstream to the upstream edge of Area 2, where instream excavation is identified in the design.

I will be available for a 10CST/11EST conference call on Monday 6/25 and can be reached at 517-241-3459.

Thanks
